## **DETAILED ACTION**

### ***Specification***

The disclosure is objected to because of the following informalities: In page 8, on line 3, "preferable" should be replaced with – Preferably, --; and in page 10, on lines 2-13, numeral "40" is not seen illustrated.

Appropriate correction is required.

### ***Claim Objections***

Claims 1, 3-5, 7-11, 13 and 14 are objected to because of the following informalities:

In claim 1: on line 3, after "chip", -- , --(comma) should be inserted; on line 5, "capable of . . . instance" should be replaced with – configured for, in a first instance, --; and on line 6, "capable of" should be replaced with -- for --.

In claims 3-5: on line 1, "can be" should be replaced with – is --.

In claim 7: on line 4, after "amphetamines", -- . --(period) should be inserted.

In claims 8-11, 13 and 14: on line 1, after "1", -- , --(comma) should be inserted.

Appropriate correction is required.

### ***Drawings***

The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the housing for the light source and the handheld housing called for in claim 16 must be shown or the feature(s) canceled from the claim(s). Further, numeral "40" is not seen illustrated in Fig. 2; and this Fig. cannot be clearly seen. No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

## **INFORMATION ON HOW TO EFFECT DRAWING CHANGES**

### **Replacement Drawing Sheets**

Drawing changes must be made by presenting replacement sheets which incorporate the desired changes and which comply with 37 CFR 1.84. An explanation of the changes made must be presented either in the drawing amendments section, or remarks, section of the amendment paper. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). A replacement sheet must include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of the amended drawing(s) must not be labeled as "amended." If the changes to the drawing figure(s) are not accepted by the examiner, applicant will be notified of any required corrective action in the next

Office action. No further drawing submission will be required, unless applicant is notified.

Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and within the top margin.

### **Annotated Drawing Sheets**

A marked-up copy of any amended drawing figure, including annotations indicating the changes made, may be submitted or required by the examiner. The annotated drawing sheet(s) must be clearly labeled as "Annotated Sheet" and must be presented in the amendment or remarks section that explains the change(s) to the drawings.

### **Timing of Corrections**

Applicant is required to submit acceptable corrected drawings within the time period set in the Office action. See 37 CFR 1.85(a). Failure to take corrective action within the set period will result in ABANDONMENT of the application.

If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings MUST be filed within the THREE MONTH shortened statutory period set for reply in the "Notice of Allowability." Extensions of time may NOT be obtained under the provisions of 37 CFR 1.136 for filing the corrected drawings after the mailing of a Notice of Allowability.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 6, 7, 11 and 14-16 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 6: line 2 is not understood. As now written, "the condition" has no antecedent basis. And it is clear to what element the "condition" is associated with. Perhaps, "the condition" should be changed to -- a condition of the eye --.

Claim 7, depending from claim 6, inherits the indefiniteness thereof.

In claim 11: line 3 is not understood. Perhaps, the phrase "attached . . . so" should be replaced with – configured to be attached near the subject's eye so that --.

In claim 14: on line 2, "the subjects" has no antecedent basis.

In claim 15: the recitation is inconsistent and confusing. It is suggested as follows: on line 1, "movements" should be – movement – to be consistent with line 3, since only one eye motion is called for; on line 2, "using" should be replaced with – and --; and on line 3, after "subject's eye", -- directly onto the motion transducer – should be inserted.

In claim 16: the recitation is not understood. It is suggested as follows: on line 1, "that includes" should be replaced with – further comprising --; on line 2, "and"(first occurrence) should be deleted; on lines 2 and 3, the phrase "a motion . . . apparatus," should be deleted; and on lines 3 and 4, the phrase "housing . . . portable" should be replaced with – housing for supporting all components of the system for ready portability --. In the latter portion, it should be noted that (in the claim, on lines 3 and 4) "the entire device" recited has no antecedent basis.

#### **Allowable Subject Matter**

Claims 1-5, 8-10 and 13 are allowable.

Claim 15 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Claims 6, 11 and 14-16 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
